

BURLA ROHITH

AI / ML Developer | Python | Machine Learning | NLP

✉ burlarohith999@gmail.com | ☎ +91 9398753030 | [\[in\] linkedin.com/in/rohith-burla](#) | [\[gh\] github.com/Rohithburla51](#) | Hyderabad, TG

PROFESSIONAL SUMMARY

AI/ML developer with hands-on experience building machine learning models, NLP systems, and computer vision applications. Comfortable taking projects end-to-end — from model design and training to deployment. Strong problem-solver with a collaborative mindset and a focus on practical, real-world solutions.

TECHNICAL SKILLS

Languages: Python, Java, C, C++

AI / ML: Machine Learning, Deep Learning (CNN, SegFormer), NLP, Computer Vision, MediaPipe, PyTorch

Frontend / Mobile: Flutter, Figma, HTML5, JavaScript

Databases: MySQL, Firebase, Firestore

Tools: Git, GitHub

PROJECTS

Gamical Therapy | ■ Rohithburla51/GAMICAL_THERAPY

Innovation Lab — Gamified Mental Health Platform

- Built a gamified therapy system using Python and MediaPipe for real-time body and gesture tracking.
- Designed interactive therapeutic exercises that use computer vision to monitor and guide user movements.
- Integrated gamification mechanics — scoring, levels, and rewards — to improve patient engagement and adherence to therapy programs.

Divya Drishti | ■ Rohithburla51/DIVYA_DRISTI

IIT Tirupati Hackathon 2025 (Team AI AVENGERS) — Geospatial AI Platform

- Developed an end-to-end deep learning pipeline using SegFormer-B2 to extract buildings, roads, water bodies, and bridges from high-resolution drone orthophotos.
- Achieved 95.66% mIoU on the validation set, significantly exceeding the typical competition benchmark of 75–85%.
- Processed 10 production villages with 198K+ image patches with zero failures; outputs delivered in GeoTIFF and GeoPackage formats.

KEY STRENGTHS

- Solid foundation in Data Structures and Algorithms with hands-on competitive problem-solving.
- Fast at prototyping and iterating on AI/ML ideas — comfortable working across different domains.
- Team player with experience mentoring peers through complex technical topics.
- Detail-oriented when it comes to model accuracy, code quality, and building production-ready systems.
